

12<sup>th</sup> February 2021

To whom it may concern,

As Operations Director of Tims Dairy Ltd I am writing to recommend the design, manufacturing and installation services of S4 Engineering Ltd.

As part of the expansion at our Chalfont St Peter facility and to increase the manufacturing capacity of our range of Greek style yogurt products, Tim Dairy Ltd & S4 Engineering Ltd have these past 12 months worked closely to install increased services capacity, including dedicated plant rooms for both PHWS and compressed air.

After the successful design & installation of the increased services, the expertise of S4 Engineering Ltd was retained and they moved seamlessly to install additional production capacity comprising a CIP plant expansion, fermentation vessels, preparation plant (including pasteurisation), homogenisation, valve matrix's and pumps. The installation of all connecting utilities was also taken on board.

S4 Engineering Ltd.'s engineering expertise coupled with their collaborative and innovative spirit, now makes them our 'Go to' team and working partner for our most significant projects.

S4 Engineering Ltd.'s project team are detail oriented, organised and always open to constructive feedback, making our business relationship both effortless and pleasant. S4 Engineering Ltd have always understood our own production priorities and at no time has any of their activities disrupted our ongoing production needs or commitments.

I would have no hesitation to recommend S4 Engineering Ltd for the installation of any hygienic process plant and supporting systems.

If you have any further questions, please feel free to contact me.

Yours sincerely

*P. Timotheou.*

Peter Timotheou  
Operations Director
