## Service & Support

At S<sup>4</sup> Engineering, our objective is to help customers enhance, improve, and optimise their plant and equipment. This is achieved through our meticulous attention to detail, extending to even the smallest components.

With a highly skilled service team committed to delivering the best service, both in planned preventative maintenance and emergency breakdowns, you can rest assured that we will minimise downtime and enhance the performance of your plant and machinery.

S<sup>4</sup> Engineering provides national on-site coverage for scheduled and unscheduled maintenance and repair services, including emergency callouts.

Are you looking for a reliable service and support contract to optimise your plant and equipment? We can help with our range of cover!

We offer a variety of Service & Support options to suit any business:

Remote System Monitoring allows independent system analysis and incident investigation. Emergency call-out and repair services are also available, along with critical spare parts packages.

These support packages can cover up to 24/7 & 365 days a year, supporting all your Mechanical, Software, and Electrical requirements, including existing SCADA, PLC, HMI systems, with the ability to support remotely as well.

In addition to our standard support packages, we can also provide bespoke SCADA/PLC breakdown services. All information is available on request.
